SOC

AOSCO continues to support SOC with highly qualified and experienced ESP engineers.

The complex transition was executed smoothly through AOSCO's high-level expertise.

In 2019, AOSCO provided consultancy for converting Gas Lift to ESP systems.

AOSCO's partnership with SOC is founded on expertise and collaboration.

Surface Equipment Commissioning

Troubleshooting and Repair

Downhole Installations

Cable Repair

TANGIBLE RESULTS

positively and measurably impacting the
Libyan oil industry in several key ways

Increased Production

We have been instrumental in boosting overall oil production, contributing directly to Libya's economic growth and energy security.

Enhanced Efficiency

Our interventions have optimized production processes, leading to increased efficiency and cost savings for Libyan oil companies.

Knowledge Transfer

By collaborating with local professionals, we have facilitated knowledge transfer and capacity building within the Libyan oil industry, fostering long-term sustainability and self-sufficiency.

Present Zelten Yard Arrangement

Future goals

01

Drive oilfield digitalization through partnerships with Kellton and GoEasyFlow

02

Collaboration with NOV to introduce cutting-edge ESP equipment in Libya

03

Focus on sustainable growth by integrating advanced technology into field operations

04

Enhance operational efficiency and foster innovation through advanced solutions.

Gas Lift Automation and Digitalization

ESP Automation and Digitalization

Real Time Monitoring of Libyan Oilfields
